TECHNICAL BULLETIN
SEYCO PWB

DESCRIPTION

SEYCO PWB is a state of the art 100% dry anti-redeposition aid. The product has multiple applications. It can be used very effectively as an additive in formulated cellulase and lacasse enzyme formulations, as an anti-redeposition aid, as a soap off of printed goods to prevent cross staining of colors or to reserve white components on printed garments, on flat finished denim to give better contrast and prevent dye deposition.

It can also be used in powdered cellulase or lacasse enzyme formulated products to promote cleaner, and less dye deposition on garments or textiles.

ADVANTAGES

- Compatible with alpha amylase and cellulase enzymes
- Whiter pockets, cleaner garments
- Excellent garment contrast
- Easy to use powder

PHYSICAL PROPERTIES

Appearance	White/Off-White powder
Solids	100%

APPLICATION

SEYCO PWB can be used on synthetic/cotton blends of denim, especially polyester/cotton and lycra/cotton to prevent anti-redeposition on the fabric and also prevents silicone spots on lycra/cotton by suspending/or emulsifying the silicone oils.

On printed textiles, **SEYCO PWB** can be used in the soap off or scour bath to remove and suspend lose surface color and prevent cross migration of colors or staining of a white component.

On denim flat finish process, **SEYCO PWB**, can be used in the mid rinse box and counter flowed to prevent anti-redeposition of indigo or indigo/sulfur dye on the fabric. This will tremendously improve the backstaining.

STORAGE

SEYCO PWB should be stored in cool dry place.
